Tango on a Visit

A film by IRENE SCHÜLLER

2014: Five young dancers from the German Black Forest are fascinated by the Argentine tango.

Helena, Susanna, Christian, Joscha and Ruben all happen to be single. They are devoted to a dance that is characterized by traditional gender roles and hierarchical structures.

Does this dance fit into modern everyday life? What impact does their passion have on their social interaction and their longing for a partner?

„Tango on a Visit“ takes a sensitive and honest look at the tango scene of the time and the emotional conflicts that often remained hidden behind the elegant facade of the dance and sometimes still exist.
